-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

35 U.S.C. 112, first paragraph, requires the specification to be written in "full, clear, concise, and exact terms." The specification is replete with terms, which are not clear, concise and exact. The specification should be revised carefully in order to comply with 35 U.S.C. 112, first paragraph. Examples of some unclear, inexact or verbose terms used in the specification are: line 9—"the appliance will be fallen down". The specification has numerous errors in syntax and grammar and is required to be redrafted.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tsao in view of Hashizawa et al. Tsao teaches the claimed subject matter except for showing use of a magnetic coupler between the appliance and the power plug. The

Art Unit: 3742

patent to Hashizawa is applied for teaching the same as conventional and leading to more safety for the consumer. In view of this teaching it would have been obvious to modify the Tsao appliance with magnetic safety means as such, to enhance the safety of the appliance. Note figures 2 and 8 in Hashizawa et al . Use of a magnetic circle as per claim 2 is an obvious choice dependent on the break away for designed for the appliance. Note that many shapes are available such as rectangular, etc. that would function equally.

Response to Arguments

Applicant's arguments and affidavits with respect to the Mendelson et al patent have been fully considered and are persuasive. For that reason the claims have been rejected under newly disclosed art.
